

Software Project Evaluation Rubric

Criteria	Excellent (2 Marks)	Good (1 Marks)	Satisfactory (0.5 Mark)	Needs Improvement (0 Marks)	Marks
Problem Understanding & Related Works (CO1, PO1, PO2)	Demonstrates a deep understanding of software engineering principles, requirements analysis, and clearly defines project objectives, background, and related works with strong references and relevance.	Provides a good background and related works but lacks some references.	Basic introduction with minimal references and lacks depth.	Poorly structured or missing related works.	/2
Software Requirements Specification (CO2, PO2)	Well-documented requirements with clear model selection, structured data collection methods, detailed use cases, and properly structured diagrams.	Most requirements are well-defined, but minor inconsistencies in models or diagrams.	Basic requirements covered but missing key diagrams or lacks clarity.	Poorly defined requirements, missing key elements like use cases or diagrams.	/2
Graphical User Interface (CO3, PO5)	Well-designed, user-friendly, and responsive interface using appropriate modern tools. Clearly aligns with project requirements.	Functional interface with minor design issues or usability concerns.	Basic interface with usability concerns and inconsistencies.	Poorly designed or incomplete interface.	/2
Project Estimation & Planning (CO2, PO2)	Realistic and well-structured project estimation and planning with justified efforts.	Covers estimation and planning with minor gaps or inconsistencies.	Basic estimation, lacks detailed planning and effort justification.	Incomplete or missing project estimation and planning.	/2
Ethical & Security Issues (CO4, PO9)	Strong analysis of ethical and security concerns, demonstrating a deep understanding of software engineering challenges.	Covers most ethical and security concerns but lacks depth in one or two aspects.	Addresses some ethical concerns but missing key security aspects.	No consideration of ethical or security concerns.	/2
Limitations, Future Work & Conclusion (CO4, PO9)	Clearly outlines system limitations, insightful discussion on future improvements, and well-structured conclusion.	Identifies some limitations but lacks depth in future scope.	Mentions limitations but minimal insight into improvements.	No discussion of limitations, future work, or conclusion.	/2
Team Collaboration & Time Management (CO4, PO9)	Excellent teamwork, effective collaboration, and timely completion of milestones.	Good teamwork with minor coordination issues; deadlines mostly met.	Some teamwork issues; deadlines are occasionally missed.	Poor teamwork, lack of coordination, and frequent missed deadlines.	/1
Total Marks	/13
